COLLEGE OF LETTERS AND SCIENCE

Saturday, June 13, 2015; 9 a.m., 2 p.m. and 7 p.m.

MESSAGE FROM CHANCELLOR KATEHI

Dear Class of 2015,

Congratulations to you, your families, friends and loved ones on reaching graduation day. You have worked hard and earned a degree from one of the best public research universities in the world, a school that is known and respected around the globe.

Your journey to this day began long before you came to Davis. Indeed, this day represents a lifetime of hard work and dedication. You took many different roads to get here, and you came to UC Davis with intellectual curiosity and a hunger to learn. I hope you feel as much pride in your accomplishment as we do in seeing you achieve it.

Of course, this is just the next step in your education, not a destination. Everything you learned and experienced at UC Davis, as well as the friendships and relationships you have developed, will serve you well for the rest of your lives. I hope you view today's Commencement, and all it represents, not as the end of your education but the beginning. I am confident your love of learning and commitment to service that were nurtured during your college experience will grow stronger as you move forward in your lives.

No matter what you pursue in life or where you may go, you will always be part of the UC Davis community. My heartiest congratulations to you and your families on this momentous occasion. You have my best wishes for a bright and fulfilling future.

Sincerely,

A handwritten signature in black ink that reads "Katehi". The signature is fluid and cursive, with a large, stylized initial "K".

LINDA P.B. KATEHI
Chancellor

THE REGENTS OF THE UNIVERSITY OF CALIFORNIA

The university is governed by The Board of Regents, which under Article IX, Section 9 of the California Constitution has “full powers of organization and governance” subject only to very specific areas of legislative control. The article states that “the university shall be entirely independent of all political and sectarian influence and kept free therefrom in the appointment of its Regents and in the administration of its affairs.”

ACADEMIC DRESS IN THE UNITED STATES

The ceremony of commencement is the most formal occasion celebrated by the university, and the participants traditionally wear academic dress, their official robes of office.

The origins of academic dress date back to the Middle Ages, when learning was largely confined to the church. The cap, gown and hood of modern usage descended from articles of dress worn by church dignitaries, likely for warmth in unheated buildings.

The cap, of serge or broadcloth, is worn by holders of all degrees, but those with doctorates are entitled to wear a gold tassel and may substitute a velvet tam.

Gowns for the bachelor's degree have pointed sleeves; for the master's degree, oblong sleeves; and for the doctoral degree, round, bell sleeves with bars of velvet either in black or in the degree color.

Bachelor's recipients have the option of wearing a Stole of Appreciation decorated with the university seal as a symbol of achievement. Holders of higher degrees wear the hood, which represents a cowl that was used at one time to cover

the head. The doctor's hood is slightly longer than the master's and has a rounded shape. Each has a silk, satin or velvet border on the outside in colors representing the discipline in which the wearer received his or her degree. The assignment of those colors was standardized in the United States in the late 19th century and includes green, the color of medieval herbs, for medicine, maize for agriculture and golden yellow, standing for the wealth that scientific research has produced, for the sciences. The trim for Doctor of Philosophy is dark blue. Some other examples are:

- Arts and Letters *white*
- Business *beige*
- Education *light blue*
- Engineering *orange*
- Fine Arts *brown*
- Law *purple*
- Veterinary Medicine *gray*

The hoods are lined in the school colors. The University of California colors are blue and gold. Here are some examples of others:

- Chicago *maroon*
- Columbia *light blue and white*
- Cornell *carnelian and white*
- Harvard *crimson*
- Illinois *navy blue and orange*
- Indiana *cream and crimson*
- Michigan *maize and blue*
- Minnesota *gold and maroon*
- Pennsylvania *cardinal and navy blue*
- Princeton *orange and black*
- Stanford *cardinal*
- Washington *purple and gold*
- Wisconsin *cardinal*
- Yale *blue*

HISTORY OF THE UNIVERSITY OF CALIFORNIA, DAVIS

For more than a century, the University of California, Davis, has prepared and inspired students and discovered solutions to some of society's most pressing problems. Now ranked among the top 10 public research universities in the nation, according to *U.S. News and World Report*, UC Davis has a long history of fulfilling its land-grant mission of improving lives through scholarship, research and service.

The roots of UC Davis reach back to the late 19th century, when Peter J. Shields, a Sacramento judge and former secretary of the California State Agricultural Society, tirelessly advocated for the improvement of agricultural education at the University of California. Due in large part to his leadership, in 1905 the California Legislature approved the establishment of a state agricultural school as a branch of the university.

The location of the agricultural school was not decided, however, until 1906, after George Washington Pierce, Jr., a prominent local farmer and the first University of California graduate from the Sacramento Valley, lobbied Governor George Pardee and others and rallied local boosters to contribute land and water rights to establish the school in Davisville. Pierce secured the deeds to the land,

the water rights, titles and abstracts, and delivered them to Governor Pardee on June 25, 1906.

In 1907, the first campus structures were built—the judging pavilion, the water tower and the creamery building—and the town's name was changed to Davis. In October 1908, the University Farm opened to provide farmers short courses in the latest agricultural methods and technology. The following January, the campus welcomed the inaugural class of 18 students, nine of whom would graduate in 1911.

Research to serve the state's burgeoning agricultural industry began on the campus even before classes opened, with an immediate focus on cereal crops and irrigation, along with investigations launched in the creamery and laboratory. The first set of courses covered animal husbandry, crops, horticulture and viticulture, irrigation and veterinary science. And in these early days began the strong interdisciplinary collaboration that would come to

characterize the research enterprise at UC Davis.

During the next decade and a half, the campus grew from a small school offering practical opportunities for young farmers into a four-year institution prepared to educate California's future agricultural leaders. The first women students arrived on campus in 1914.

The campus name changed from University Farm to Northern Branch of the College of Agriculture in 1922. Later that decade, the humanities and engineering departments and band were created, and the students chose the mustang for their mascot and adopted the Aggie nickname. By that time, the school had already attracted international attention, enrolling students from Australia, Chile, China, Mexico, India, Germany and the Philippine Islands.

The university continued to grow throughout the 1930s despite the Great Depression. In 1938, as the national economy began to revive, the campus completed a modern gymnasium with the first swimming pool in Davis. Interest in sports, particularly boxing, football and baseball, picked up. Then, with the United States' involvement in World War II, campus life was disrupted. From January 1943 until November

1944, the campus was converted into a training ground for the Western Army Signal Corps.

The late 1940s and 1950s saw rapid growth and change for the university. The School of Veterinary Medicine was founded in 1948 and the College of Letters and Science in 1951. In 1948, 101 Bachelor of Science degrees and 195 certificates of graduation from the two-year curricula were awarded at the first commencement ceremony held on campus. In 1949, the university had the highest growth rate of any campus in the university system and, in 1950, the Davis campus conferred its first Ph.D.s—in plant physiology, comparative pathology and genetics.

In October 1959, more than 50 years after its founding, the UC Regents officially declared the University of California farm school a general campus—the University of California, Davis.

Since then, UC Davis' prestige and academic programs have only grown. The 1960s welcomed the School of Law, the School of Medicine and a graduate studies division. The campus's art department was catapulted into the national spotlight in the 1960s by faculty members Wayne Thiebaud, Robert Arneson, Roy DeForest, Manuel Neri and William T. Wiley, who founded an art movement known as California Funk that challenged the pretentiousness of art at the time. The department's impact on art in the U.S. remains strong.

UC Davis has become a national leader in science, human and veterinary medicine, biological sciences and engineering. The UC Davis Medical Center, founded in 1973, has since become recognized as one of the premiere

research and teaching hospitals in the nation. Additionally, UC Davis has been an integral partner with industry in developing energy efficient transportation technologies, including hybrid and electric vehicles. And the Graduate School of Management, founded in 1981, now draws daytime and executive M.B.A. students to its three campuses in Davis, Sacramento and the Bay Area.

In 2003, UC Davis joined the Big West Athletic Conference, moving to Division I of the National Collegiate Athletic Association, continuing a long tradition of athletic success coupled with academic success.

In 2010, the campus launched its first comprehensive fundraising campaign, The Campaign for UC Davis, and raised \$1 billion in contributions from over 100,000 donors in 2013.

Today, UC Davis is physically the largest of the 10 campuses of the University of California with 5,300 acres. The campus has more than 34,000 students, an annual budget of nearly \$3.8 billion, including research funding nearly \$750 million, a comprehensive health system and 13 specialized research centers.

The university offers interdisciplinary graduate study and more than 99 undergraduate majors in four colleges—Agricultural and Environmental Sciences, Biological Sciences, Engineering, and Letters and Science—and advanced degrees from six professional schools—Education, Law, Management, Medicine, Nursing and Veterinary Medicine.

Graduate Studies offers advanced study and research opportunities in over 90 programs. And UC Davis is one of only 62 universities admitted to the prestigious Association of American Universities.

Distinguished UC Davis faculty and emeriti faculty have garnered many prestigious national and international awards. UC Davis boasts 22 National Academy of Sciences members; 13 National Academy of Engineering members; 13 Institute of Medicine members; 24 American Academy of Arts and Science members, including current UC Davis Chancellor Linda P.B. Katehi; two American Academy of Arts and Letters members; three MacArthur fellows; two Pulitzer Prize winners; and five Royal Society members.

The university's distinguished alumni include former U.S. Secretary of Agriculture and former Executive Director of UNICEF Ann Veneman, celebrity chef Martin Yan of "Yan Can Cook," California Chief Justice Tani Cantil-Sakauye, NASA astronaut Tracy Caldwell and former astronaut and now professor Steve Robinson.

UC Davis is ranked first among world research universities in the agricultural sciences (Quacquarelli-Symonds World University Ranking, 2013).

ADVENTURE IS OUT THERE!

Thank Mom

UC DAVIS

2015 GRADUATING CLASS

“As a graduate of UC Davis, you join a century-old legacy of world-class scholarship and public service. This achievement is a true milestone and a powerful example of all your hard work and commitment to a lifetime of learning.”

– Chancellor Linda P.B. Katehi

COLLEGE OF AGRICULTURAL AND ENVIRONMENTAL SCIENCES

The UC Davis College of Agricultural and Environmental Sciences is one of the largest colleges of its kind in the country and is widely regarded as the best among the nation's land-grant colleges. UC Davis' proud past and enduring reputation in the agricultural, environmental and human and social sciences began with its foundation as the landmark college at UC Davis in 1908.

Today, the college addresses societal needs in the larger contexts of food systems, agricultural production,

economic development, environmental and natural resource stewardship, community development, land and the built environment, and human health and well-being.

Undergraduate students pursue a broad array of college majors that span the biological, physical, environmental and human/social sciences. An overarching theme of "science with an impact on society" prevails as part of the land-grant mission.

Across the college, faculty continue to earn national and international recognition for teaching, research, and outreach. One of greatest rewards for a faculty member comes from teaching students, sharing knowledge, helping students reach their full potential, and working side-by-side with students in the laboratory, field, and classroom.

MESSAGE FROM DEAN HELENE R. DILLARD

Dear Graduates,

Congratulations on this momentous occasion! It is my honor to join your family and friends, and our entire UC Davis campus in expressing our warm accolades on your completion of undergraduate studies in the renowned College of Agricultural and Environmental Sciences. Graduation from this college at the University of California, Davis, is an honor and an outstanding achievement. While here, you have honed your leadership and critical thinking skills, and we are proud of your dedication, perseverance, and accomplishments.

Whatever your future goals — careers, postgraduate studies, community service, travel, improving the world, raising families — you are now joining the ranks of our distinguished UC Davis alumni. Your education from this excellent university will provide you with exciting opportunities as you move forward in life. Whether your interest is feeding the world, addressing climate change, building communities, economic development, or one of many other challenges, we hope that we have inspired you to continue to learn and strive for new opportunities.

Many people have supported you in succeeding and reaching graduation — we hope you will remain connected to the faculty, staff, and students in your UC Davis “family” (www.alumni.ucdavis.edu). We also encourage you to mentor those who come after you, and help them be successful university graduates. Your support is important to us as we continue to excel in serving future students, as well as the people of California, the nation, and the world. Please use the knowledge, skills and experiences gained at UC Davis to produce a rewarding life for yourself, while also making your community, the nation, and the world a better place.

Enjoy all of today’s well-earned celebrations and all that comes next in life’s journey. Fellow Aggies, I wish you the best.

Sincerely,

HELENE R. DILLARD

*Dean, College of Agricultural and Environmental Sciences
(M.S., '79, Soil Science; Ph.D., '84, Plant Pathology)*

LET'S
GO
AGS!

UC DAVIS HOMEcoming 2017

COLLEGE OF ENGINEERING

The College of Engineering at UC Davis, established in 1962, can trace its roots to the first engineering program at Davis offered in 1915, with joint degrees through UC Berkeley offered in 1926.

University of California President Clark Kerr set up a systemwide committee to look into the future of engineering in the university in 1959. Roy Bainer, who represented UC Davis on the committee, worked with the engineers teaching at Davis to create a core curriculum with options in agricultural, chemical,

civil, electrical and mechanical engineering that could be offered at UC Davis by 1962.

The UC Regents authorized the engineering faculty at Davis to operate as a department of the College of Engineering at Berkeley. The following year they authorized a separate college at UC Davis and named Roy Bainer as its first dean.

Roy Bainer served as dean of the College of Engineering from 1962 to 1969; John D. Kemper served from 1969 to 1983; M.S. Ghauri from

1983 to 1996; Alan J. Laub from 1996 to 2000; Zuhair A. Munir from 2000 to 2002; Enrique J. Lavernia from 2002 to 2010; Bruce R. White from 2009 to 2010; and Lavernia, again, since 2011.

The UC Davis College of Engineering has awarded more than 22,500 degrees to students from around the world.

MESSAGE FROM DEAN LAVERNIA

Dear Students, Family and Friends,

It is a pleasure to welcome you to the 2015 commencement for the College of Engineering at the University of California, Davis. Commencement is always a highlight of the academic year, and we are delighted to celebrate our graduating students' accomplishments today.

Created in 1962, the UC Davis College of Engineering consistently ranks among the top engineering schools in the nation. The College of Engineering's seven academic departments offer undergraduate and graduate education in the fundamentals of engineering, while preparing students to creatively address society's most challenging technological problems. Our faculty—who are often national or international leaders in their disciplines—engage students to advance the leading edge of engineering knowledge.

The College of Engineering at the University of California, Davis provides an undergraduate engineering education based on strong fundamentals, providing graduates with the tools they need for successful careers as they continue to grow and adapt in this dynamically changing technical world.

Our graduate programs integrate teaching, research and service to offer highly qualified students the opportunity to find answers to society's most challenging problems. Faculty and graduate students make important contributions to research understanding and societal well-being to serve California, the nation and the world.

Students graduating today from the College of Engineering successfully completed a challenging curriculum that fostered the development of disciplined learning skills and the ability to think critically. The faculty and staff of the College of Engineering are proud of our academic programs and take special pride in the students who graduate from them.

I know that our students' family and friends share this pride. I am pleased you can join us today to honor our graduates on this special occasion.

ENRIQUE J. LAVERNIA
Dean of the College of Engineering

COLLEGE OF ENGINEERING STRATEGIC LEADERSHIP BOARD 2014-15

COLLEGE OF LETTERS AND SCIENCE

The College of Letters and Science at UC Davis was established in 1951. The college is the largest in the university, educating almost all undergraduate students at some point during their careers at UC Davis. It is made up of three divisions, encompassing the broadest offering of disciplines at UC Davis: Humanities, Arts and Cultural Studies; Mathematical and Physical Sciences; and Social Sciences. More than 650 faculty members develop and guide the

college's more than 50 departments and programs, many of which are ranked among the best in the world.

Letters and Science is committed to providing the best education possible and to cultivate a brighter future for generations to come. By providing critical thinking and fundamental education to its students, the college opens doors for future leaders, great thinkers, accomplished scholars,

and strong global citizens. The college also creates opportunities for undergraduate research and provides enhanced enrichment programs. It is the point from which bright new futures begin. It is the heart and soul of UC Davis.

MESSAGE FROM THE DEANS

From left to right: Interim Dean Susan B. Kaiser,
Dean George R. Mangun and Interim Dean Alexandra Navrotsky.

Dear Class of 2015,

Today, you receive your degree from the UC Davis College of Letters and Science. You can count yourself amongst more than 85,000 leaders and achievers around the world who have come before you to receive their Letters and Science degrees. They stepped into a future full of exciting possibilities thanks to their hard work at UC Davis – and we know that you will, too. As graduates of UC Davis, you have accomplished what you came here to achieve. You have acquired the skills

and ability to lead, and you know how to solve problems, often in strikingly innovative ways. You are now ready to follow your chosen path. Your pursuit of a college degree has required hard work, perseverance and sacrifice. You should be very proud of your accomplishments today. As you embark on your next journey, we hope you will look back on your experience in the College of Letters and Science and UC Davis with fond memories and appreciation for all you have learned. Use the knowledge and experience that you have acquired to serve society, make a difference in the ways that we know you can, and most of all, enjoy following your path. Congratulations to you and your family on this special day.

SUSAN B. KAISER

Interim Dean of the Division of Humanities, Arts and Cultural Studies

GEORGE R. MANGUN

Dean of the Division of Social Sciences

ALEXANDRA NAVROTSKY

Interim Dean of the Division of Mathematical and Physical Sciences

MESSAGE FROM THE CAL AGGIE ALUMNI ASSOCIATION

Richard Engel

Dear Graduate of the Class of 2015,

On behalf of the Cal Aggie Alumni Association, we are delighted to welcome you into the UC Davis alumni family. You've worked long and hard, and you should feel a great sense of accomplishment and pride upon reaching this milestone.

We are proud to say you are part of the Aggie alumni family that is now 230,148 strong around the world. The Cal Aggie Alumni Association is here to provide the many services, programs and events that will keep you connected to your alma mater throughout your life. In return, there are many ways that you can become an active member of our alumni family, and we hope that you will choose to do so.

Today is all about you and celebrating your graduation from UC Davis. We wish you the best of luck.

Congratulations!

A handwritten signature in black ink that reads "Richard R. Engel".

COMMENCEMENT AND ALUMNI RESOURCES

YOUR DIPLOMA

Your diploma will be available in the registrar's office four months after graduation. It may be picked up in Room 12, Mrak Hall (call 530-752-3639 first to ensure it's ready), or you may have it mailed to you by filling out a form that is found on the Web at registrar.ucdavis.edu.

Information on obtaining a transcript of your academic work may also be found online at registrar.ucdavis.edu/records/transcripts.

COMMENCEMENT PROGRAM COPIES

Additional commemorative commencement programs may be purchased outside of the the Pavilion on the day of your graduation. You may also purchase additional copies from the UC Davis Store at the Memorial Union. For more details, visit commencement.ucdavis.edu.

LIVE AND ON-DEMAND VIDEO STREAMS OF COMMENCEMENT CEREMONIES

Visit commencementvideo.ucdavis.edu for links to both live and on-demand video streams in various formats that will be broadcast during UC Davis' commencement ceremonies. On-demand streams will be available approximately 30 minutes after the ceremonies have concluded.

AGGIE CONNECTIONS

As graduates of UC Davis, you will receive the quarterly *UC Davis Magazine*. It's our way of letting you know what's happening here—research discoveries, student trends, the ever-changing face of the campus—and of keeping you informed about the activities of your classmates.

Please make sure we have your current address. Submit updates by visiting www.alumni.ucdavis.edu and filling out your profile.

ONE AGGIE NETWORK, MANY CONNECTIONS

The Cal Aggie Alumni Association (CAAA) is *your* alumni association. It can help with your career, keep you connected with UC Davis news, activities and events and provide a host of benefits, from discounts on career services to a free subscription to the award-winning *UC Davis Magazine*.

The association is also an avenue for your continued involvement with the university. It's the continued participation and support of alumni that keep UC Davis a world-class university.

Visit the CAAA website for the most current alumni group listings and events. There you will also find information on how to keep your UC Davis email account. For more information, call 800-242-GRAD, email alumni@ucdavis.edu, or visit www.alumni.ucdavis.edu.
